Innovate. Act. Deliver.

NXG Labs is a state-of-art technology solution provider. Advancement with innovation and precise implementation is what we highly value at NXG Labs. For years NXG Labs has been solely dedicated to design, development and testing of many impressive and innovative software products. With highest commitment and customer focus we are known to deliver on complex banking solutions, secure android & IOS applications and custom software development.

With its head office in Pune, NXG Labs is ideally suited to help you effectively and be your one stop solution provider for all cutting edge technological services.

NXG started its journey in 2009 as experts in software development & consultancy services in Pune. NXG's operations are strategically segmented into corporate products, retail products & software services. NXG's portfolio ranges from ERP products for big corporate houses to software products for small retailers.

NXG Currently offers its services to over 150 satisfied customers. These services include software product development, mobile application development, staff augmentation and consultancy services. At NXG, we serve our clients from multi-national corporations to proprietary firms with equal zest.

NXG specializes in developing complex solutions for banks including payment processing, prepaid card systems, virtual cards, payment gateways, AFCS systems, etc.

Our Services

Android & iOS Application Development

The ever increasing global market for smart-phones has also shot up the graph of custom mobile applications, with a pace never seen before.

In this era of ever increasing technological heights we are not just a part of this change but are one of the active contributors. With one of the most pro-efficient & enthusiastic development teams in market, with a flair for android & iOS apps and best resources we work with complete devotion towards only goal to achieve client satisfaction.

Custom Web Application Development

PHP Development

PHP is a great HTML-embedded server-side scripting language, and is the main significant option for developing energetic and interactive websites. Our PHP Web Development Service is more experimental, integrative, qualified and ropes for web standards causing it to be the wonderful platform to develop and set up modern web stuff.

Open Source Development

We are a PHP/MySQL programming service provider, with years of experience in such technologies as PHP, MySQL, Smarty, CodeIgniter, CakePHP, Regular Expressions, Object Oriented Analysis & Design, Apache, and many other programming languages, frameworks and software packages. This helps us understand all the open source applications like Wordpress, Joomla, Opencart, OScommerce, Magento, etc in depth and thereby provide proficient services when it comes to customization of these applications.

ASP .NET Development

NXG Labs Pvt Ltd is one of the leading solution providers in the field of web application development based on the .NET platform. We also have the unique distinction of being one of technology providers to some big brands in the industry. Our team of highly skilled and qualified professionals have hands on experience on ASP.NET 4.0, C#, VB.NET and similar technologies supported by the .NET platform.

Java Development

Java

Software Development

Apart from their experience in .NET, Java, Java Script, Angular JS, HTML5 and CSS, our software engineers provide services related to secure application architecture and framework development. The team works with C, C++, VC++ and C-Sharp (C#) as well. Web application maintenance, life cycle testing for web based application and client server products development are a few of the other services successfully provided by us.

Desktop Application Development!

NXG Labs Pvt Ltd leverages the best-of-technologies to develop rich, user-friendly and effective Desktop Applications that work offline and run off the web browser. We help you spruce-up your business environment through rich, easy-to-use, easy-to-access, new-generation Rich Desktop Applications (RDAs) and Rich Internet Desktop Applications (RIDAs). Our desktop applications facilitate instant content synchronization, quick file system access and ready management of downloadable content even while working offline

Applying our industry expertise and technical experience, we develop Desktop Applications that tone-down the complexity of your business processes, improve your performance and accelerate your business productivity. By making complicated and tedious operations simpler, our Desktop Applications help you synchronize important processes and streamline your IT operations in a proper, growth-enhancing manner. Keeping up with the GDM, our “Webified” desktop applications are on par with Rich Internet Applications and allow you to enjoy the multifarious features and facilities offered by RIAs.

Service Highlights

We engage in designing and building Desktop applications that involve Visual Basic development, C# development, VB.NET development, Adobe AIR, JAVA Development - Swing and other technologies. Strategically-effective, risk-repellent and easy-to-maintain, our applications facilitate enhancements that are modular to upgrades and changes and hold proof against data thefts or technical mishaps. Our Desktop Applications development spans several platforms and languages.

Staff augmentation

NXG Provides Trained and Experienced developers for on-line support systems

Our proficient & experienced developers are considered to be the wizards with android SDK, dot NET, Java, PHP and open source technologies, with no boundaries left to explore to shape and deliver your dream application.

Whatever applications you wish to develop just name it. From business/office application, communication, news to fun, entertainment, travel & utility application .We will be more than happy to develop it.
